Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10-23 and 25-31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ahlers et al. (USP 6,200,444).

Ahlers et al. teach a cation selective sensor that in the presence of target analytes registers detectable changes in the electrical characteristics of the sensor. Column 9 lines 40 teaches Ca^{++} is one of the analytes and column 10 line 31 teaches cryptands included in the sensor.

Allowable Subject Matter

Claims 9 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art fails to teach BAPTA as an electrochemical/electronic type of indicator. The cited prior art teaches BAPTA as a fluorescent indicator for optical analysis of the claimed ions of interest.
